

ABSTRACT

An electric toothbrush is provided. The electric toothbrush has an elongated body, a head, and a neck extending between the body and the head. A plurality of bristle carriers each having a plurality of bristle tufts are disposed on the head. An electric motor is operatively connected to a shaft, wherein operation of the electric motor moves the shaft in a reciprocating motion and wherein the shaft is operatively connected to at least one of the bristle carriers to move the bristle carriers.

"Express Mail" mailing label number EY249878681US

Date of Deposit April 16, 2004
